

WARMLY WELCOME TO POLARIS IGLOO LEVI

*In this folder you will find information about the Igloo and tips for a successful vacation.
Please familiarize yourself with the folder at the beginning of your vacation.*

If, upon arrival, you notice any kind of defects in the holiday apartment or point out the level of cleanliness, please immediately call the person in charge of the object's maintenance!

Instructions:

Door: Always press the (*) before entering the number. Enter the door code and press the *. When you want to close the door, just press only the *. If you set the wrong number three times, it will be locked for 3 minutes.

Oven: When using the oven, always use the metal tray found in the bottom drawer of the oven. The oven and microwave are combined. To operate the microwave, press the power button and select the icon with waves. Then adjust the microwave temperature.

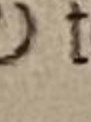

convection oven

If you will use micro, press

, and then ok.

When the food is ready, use  to switch the appliance off.

When using the **dishwasher**, there is a water tap behind the faucet that needs to be opened downward. Close the tap when the dishwasher is finished. Do not put hand dishwashing liquid in the dishwasher. Use only washing-up liquid in the dishwasher. The dishes must be rinsed before putting them in the machine. Open the dishwasher faucet before starting the machine. The machine must not be opened in the middle of the washing program. When the dishwasher is ready, the door will open.

Similarly, always open the water tap on the **washing machine**. "auki".

Bathroom temperature control is located next to the door light switch; touch the upper left corner of the display. Don't set the temperature above 23 degrees. **Heating control for the apartment** is located next to the front door light switch. Touch the display and adjust the temperature. The normal temperature in the Igloos is 20-23 °C. Do not turn off the air heat pump.

Next to the front door, there are light switches. The top switch activates the **roof de-icing**. Note that de-icing is on for about half an hour at a time. If you turn on the ceiling heater, the sauna and hot tub will turn off. **Ceiling heating, jacuzzi, and sauna cannot be on simultaneously.** Turn off ceiling heating when using the hot tub and sauna.

Sauna usage instructions: turn on the sauna and adjust the temperature settings. The sauna heats up quickly. Remember to turn off the sauna. DO NOT DRY CLOTHES IN THE SAUNA, IT CAN CAUSE A FIRE HAZARD.

For the hot tub, open the cover and turn it on. You can press different functions. Remember to close the hot tub and the cover. Do not enter the hot tub with soap. Do not put anything into the hot tub. Additional water changes will result in an additional charge.

1. The lid is opened by first lifting the front fold over the metal frame and then the lid can be folded up the back of the basin.

2. When closing the lid, press the red lever on the side of the lid holder to bring the lid back down and close. Make sure to attach the Velcro fasteners on the sides as well

On the side panel, there are buttons that can be used to turn on lights and adjust settings.

**You must NOT be on top of the pool cover.*

**Never leave the cover open when you are finished.*

Trash pin. Is next the parking area. Please put the trash into the pin.

Parking area. Is front of this igloo
